TIGER A BROMINE TABLETS: DISINFECTANT

TABLETS PLACED IN DISPENSER. TIE IN FRONT OF JET. (INCREASES DISPERSION OF BROMINE). BROMINE DOES NOT DISSOLVE QUICKLY IN COLD WATER. Dose rate is one tablet per 1000 Ltrs. An average spa is about 1200 -1500 ltr, so try 1 tablet and test with test strip. Reading should be about 2-3 ppm. Usage will depend on bather load, and how much dirt may get into spa. The colder the spa temperature the slower the tablets will dissolve. To compensate add extra tablets if spa is running cold. If heated constantly do not put as many in the dispenser. You will be able to tell the correct number by using the test strip to verify your bromine reading.

BINGO B - WATER BALANCER AND CORROSION INHIBITOR

BINGO B CONTROLS pH AND TOTAL ALKALINITY. Check levels with test strip.

BINGO B IS ADDED ONLY:

1/ IF pH AND TOTAL ALKALINITY LEVELS DROP

2/ IF STARTING UP SPA START UP DOSE FOR 1200 LTR = 400 gm

3/ TAKING OUT 10% OF WATER ADD FRESH WATER AND TOP UP DOSE OF BINGO B = 80 gm. (20% of start up dose).

NOTE: 1 LID = 100 GM

* INCREASE FILTRATION DURING WINTER TO COMPENSATE FOR COLDER WATER.

- FILTER CARTRIDGE CAN BE CLEANED WITH CARTRIDGE CLEANER
- "WUNCER". Or soak for half an hour each end in a bucket of water mixed with 1 cup white king. Hose thoroughly before putting back in filter.
- Shelf Life of Bingo B if stored in air tight drum is 12 months plus.
- Always read safety directions and instructions for use before commencing any chemical additions.
